

INCIDENT REPORT

HOME ELECTRONIC GOODS

Client

Grant, Durban - private individual

Background

Despite having a sophisticated home alarm system, the client had experienced 6 previous break-ins, with the thieves targeting his electronic equipment. The client purchased an Mtrack and hid it inside his amplifier. The device was configured to activate on deliberate motion.

Event

Only 3 days later his home security system was again bypassed. At 02:50 am the Mtrack device's movement sensor was activated. The client was contacted and at 02:55 the ITA recovery team was dispatched. After tracking the device for an hour and a half, the device appeared to be stationary and was reporting from the Cato squatter camp. As this is a high risk area, the SAPS was contacted to assist. At 04:31 the police arrived. At 04:50 the team reported that they had recovered all of the goods from an empty shack used to smoke dagga. No arrests were made.

Value

All of the client's equipment and goods including a DVD player and Playstation 2 were recovered.

Mtrack is a self-contained, self-powered, wireless location unit with the best recovery rate in the world – 5 year rolling average of 98.4%!
