

## INCIDENT REPORT

### TRANSPORT COMPANY

#### Client

Transport Company carrying wood

#### Event

The client called in and advised we need to dispatch our agents, as according to his fleet management system, one of his vehicles was reporting from an area it was not supposed to be in.

The Mtrack control room advised they were dispatching a team. The vehicle was a horse and trailer carrying a load of wood.

Shortly after getting to the area, the agents advised that they had recovered the trailer and cargo, however the horse was missing. The fleet management tracking unit was found on the road smashed and there was no sign of the driver.

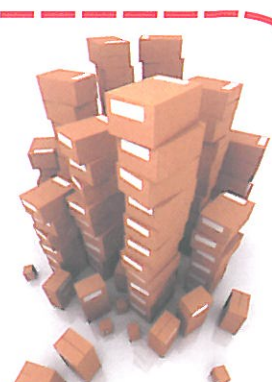

The agents searched for the horse for some time but could not locate it. The client advised that the agents could stand down.

If there had been an Mtrack unit on the horse there is little doubt that it would have been recovered as well.

#### Value

Roadhog Trailer with load – approximately R200,000.

**Mtrack** is a self-contained, self-powered, wireless location unit with the best recovery rate in the world – 5 year rolling average of 98.4%!
