SAFEGUARDING FUEL ASSETS with UNMATCHED SECURITY and EFFICIENCY.

MtrackFUEL is the ultimate solution for fleet owners and managers seeking real-time control and management of fuel usage from fixed or mobile fuel bowsers. With a comprehensive range of functionalities, **MtrackFUEL** ensures accurate, auditable, and automated fuel usage and dispensing reports, along with live data tracking.

Part of the Mtrack suite, **MtrackFUEL** addresses various operational challenges faced by commercial fleets, including asset tracking, activity monitoring, cost reduction, and supply chain management.

KEY Features.

- Real-Time Data:** Enjoy live data transfer from the control box to the online platform, crucial for preventing tampering and diesel theft, even during load shedding. Receive notifications for low fuel levels, enabling prompt fuel orders without delays.
- Asset Fuel Management:** Allocate unique tags to assets, ensuring precise tracking of fuel dispensing without manual input errors or fraud. Each transaction is automatically linked to the respective asset, providing clear visibility on fuel usage.
- SARS Rebate Reports:** Streamline the submission of rebate reports to SARS with captured data, eliminating disputes due to human intervention. Easily allocate fuel to different jobs when necessary.
- Vehicle Data Capturing:** Utilize the dedicated application for capturing vehicle odometer or engine hours, vehicle selection, and bower identification. Access captured data within minutes for review and alerts.
- Bank Fleet Card Integration:** Seamlessly integrate Standard Bank Fleet Cards into the MtrackFUEL system, ensuring automatic capture of all fleet card transactions for detailed reporting.
- Detailed Reports:** Access accurate and automated reports displaying critical data such as activation date and time, authorized tag information, GPS position, fuel dispensed, pump activation duration, and transaction details.
- Web-Based Front-End:** Benefit from a user-friendly web-based reporting and system access accessible from anywhere, including mobile devices. Enjoy hassle-free editing of fuel transactions if errors occur.

Experience the efficiency and reliability of **MtrackFUEL**, offering unmatched fuel management capabilities without the need for additional calibrations.
